

Guiding questions for reconsidering system boundaries

Considering the results of the stakeholder workshop (i.e., the main problem statement of the Causal Loop Diagram), ...

- i. Do the system boundaries decided at the beginning of the framework implementation correspond to the main WEF_e nexus problem that the stakeholders want to work on?
- ii. Do the initial boundaries include all relevant natural resources that shape or are affected by the WEF_e nexus, or are important resources missing?
- iii. Do the initial boundaries include all relevant actors that directly or indirectly shape the WEF_e nexus problems?
- iv. What are the implications for the boundaries of the focal area, does it need to be enlarged or reduced?
